## Eye wash drain cart

Strong plastic construction and a 16-gallon capacity make the emergency eye wash drain cart ideal for collection and disposal of wastewater from the STD-68G gravity-fed eye wash station. Its ergonomic design and molded wheels on a steel axle make it easy to transport outdoors, to a mop sink, or to other locations when ready to empty.

- Strong plastic construction with 16-gallon capacity
- Drain hose opening at top to collect water with screw-on cap to cover drain hose opening when transporting filled cart
- Ergonomic design for easy pushing or pulling to disposal area
- Drain cap at base of cart for wastewater disposal and can accommodate a standard water hose

## Specifications
